

The Intercept Blueprint

Go-To-Market Execution Strategy

Prepared by:
Kush Trivedi

Operating Principle: Capture behavior at the point of
decision, not attention at the point of discovery.

The Regret & Hesitation Curve

Users have zero shortage of discovery or execution platforms.
They lack clarity at the exact moment they are about to act.
Fnomo owns this gap.

Timing-Based Differentiation

All major competitors operate after a decision is formed. Fnomo operates before the decision is finalized—where uncertainty is highest and influence is strongest. Fnomo integrates with the ecosystem rather than competing against it.

Ecosystem Architecture

Layer 4 (Top/Apex) - Institutional Trust

Points: Mega-influencers, Large Fintechs, Banks

Action: Scale via trust-based adoption.

Layer 3 (Middle-Top) - Daily Influence Network

Points: Telegram admins, micro-creators

Action: Integration of Fomo insights in daily discussions.

Layer 2 (Middle-Bottom) - Validation Platforms

Points: MoneyControl, TradingView, Reddit

Action: Native participation and decision-support elements.

Layer 1 (Base - Highest Priority) - Decision Point Owners

Points: Search, Brokers, High-Ticket Retail

Action: Intent-driven routing and pre-trade signals.

Execution follows a bottom-up gravity.

We start where decisions happen daily, not where brand trust is built yearly.

The Wedge Pivot & Regret Capture

The Primary Wedge

Telegram Trading Groups	70% probability
Reddit Finance Communities	65% probability
TradingView Contributors	60% probability

Regret Creation Zones

The Economic Engine

Rule-Based Governance

Kill Rules (Deprioritize/Fix)

If Channel CAC > ₹500 → STOP Channel.

If Activation < 20% → FIX Onboarding.

If Retention Drop > 15% → FIX Product.

Scale Rules (Double Down)

If Channel CAC < ₹300 → SCALE.

If WoW Growth > 10% → INCREASE Investment.

Channel CAC Baselines

Channel CAC Baselines		
Communities	₹80-₹200	Very High Quality
Intent Search	₹150-₹300	Primary Engine
Paid Social	₹1000-₹2000	Avoid Initially

Revenue Flow Network

The 40% Flexibility Cap

Influencers:	10-25% Rev Share
Communities:	10-20% Rev Share
Fintech Platforms:	5-15% Rev Share
Banks:	3-6% Rev Share

Strategic Rule: Up to 40% reserved strictly for anchor partnerships and closed ecosystems. Do not default to maximum share; use as an entry lever.

Solo Mode Operating System

Core Principle: Team follows traction. Execution begins at once without waiting for department buildouts.

90-Day Execution Roadmap

	Phase 1: Day 0-30 (Foundation)	Phase 2: Day 30-60 (Validation)	Phase 3: Day 60-90 (Revenue Entry)
Action	Direct outreach to Telegram/Reddit. Launch 3 core decision tools.	Expand to 15 communities. Close mid-tier creators. First fintech conversations.	Close 2-3 distribution partnerships. Activate revenue sharing.
Target	5-10 integrations, 50-100 daily users.	3,000-5,000 users. 20-25% retention.	10K-15K users. 35-40% pre-action usage.
Milestone Day 14: Secure first 3-5 integrations, confirm initial behavioral capture signal.			

The Intercept Habit Loop

Fnomo is not trying to be another platform in the ecosystem. It is positioning itself as the permanent behavioral layer that influences every financial decision before the ecosystem is used.
